

Climate Friendly Businesses

CASE STUDY: MOTORFITS, LEVEN

Motorfits is a shop in Leven that sells motor components. The owners were keen to reduce their energy consumption, specifically from lighting and glazing. We carried out an energy audit in December 2022. This highlighted that installing LED lighting would make an annual carbon saving of 127 kgCO₂e and double or secondary glazing installation would save 276 KgCO₂e a year.

” What was your experience of making energy efficiency changes?

“One recommendation from the energy audit was fitting LED lighting tubes. A local electrical firm carried out this work in one day. The lights are certainly brighter and more efficient. The energy audit also recommended double glazing in the shop. We have been successfully applied for a building improvement grant and this work will take place soon. We included our energy audit in the application.

I'd encourage any business to get the energy audit and apply for any of the grants available.”

Julie Young, Motorfits Co-Owner

To find out what you can do in your business to be more climate friendly contact Business Outreach Coordinator Louise Oliver. Email louise@greenerkirkcaldy.org.uk.

Annual estimated carbon savings of 403kg CO₂e and cost savings of £169.

That is almost the same as driving from Land's End to John O' Groates and back!

Climate Action Fife is a Fife-wide partnership project, bringing together individuals, communities, local government and businesses to tackle the climate emergency and make Fife a greener and fairer place to live. The project is funded by The National Lottery Community Fund's Climate Action Fund.
