

Small Grant Fund Case Study

Friends of Pittencrieff Park

What activity did you run?

We held a public bulb planting session in the orchard to add spring colour and early pollen for pollinators in Pittencrieff Park, Dunfermline.

Who were your main audience?

Families in the Dunfermline area. Parents with toddlers came along.

What did you learn?

Monday morning might not be a good time for people to come along. We ran the event alongside our main volunteer session each week. We might try a weekend day next year if volunteers support that. Having the children along was fun for everyone!

Has your project increased your community's capacity to tackle the climate emergency?

We talked about links between the climate and biodiversity crises. We shared why we were doing it and the benefits for wildlife. The visitors seemed to be aware of the climate issues and loved wildlife, greenspaces already. They took on board how to best plant the bulbs.
