

FIFE CLIMATE FOREST

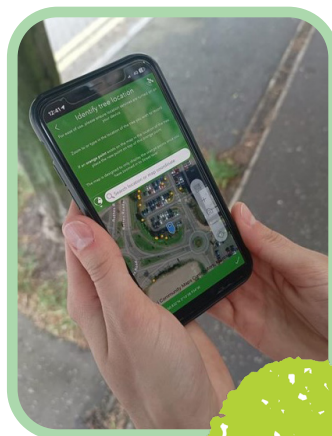

HELP MEASURE FIFE'S TREES

GET INVOLVED IN THE FIFE CLIMATE FOREST TREE CANOPY SURVEY

**A citizen science project, which will help record
Fife's amazing trees**

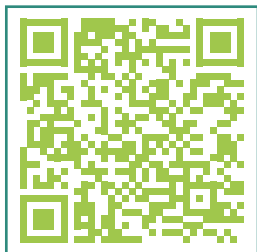

WHY IT MATTERS

Trees clean our air, reduce flooding and cool our streets but across much of Fife, tree canopy cover is surprisingly low. The Fife Climate Forest Tree Canopy Survey is building a picture of where our trees are and how healthy they are, so we can plan for a greener future. Every tree you record makes a difference and you can make a difference too!

LET'S GET STARTED - FIVE EASY STEPS

1. Download the free ArcGIS Survey123 app.
2. Scan the QR code to access the "Fife Climate Forest Tree Canopy Survey".
3. Find a tree and drop a pin on the map.
4. Record the species, measure the trunk and canopy and rate its health.
5. Submit — and you're done!

Scan Me!!

Suitable for individuals, families and school groups - a great activity for Fife STEM and outdoor learning.
